Abstract of EP0358035

A granular mixture containing a granulated developer substance, a granulated anti-oxidising agent and a granulated alkali donor, the granulated developer substance being spherical and having a mean particle diameter of $\geq 150 \mu m$, and 80 % of the grains being within a range which does not deviate by more than $\pm 100 \mu m$ from the desired grain diameter, does not form dust, is free-flowing, infinitely stable in water vapour-tight packaging and dissolves within a very short time.
